

PRODUCT UPDATE – Q1 2026

Your Next Animal Facility Management Software

We are pleased to share new improvements included in our Q1 ZETA Update. This major release brings enhanced welfare monitoring, faster response tools, more flexible exports, and smoother processing of large-scale operations.

What's new in ZETA:

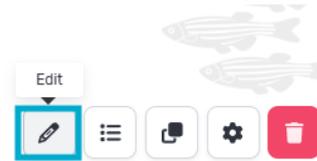

- **Better welfare monitoring:** ZETA now enables you to set and monitor optimal ranges for **sex ratio** and **animal density** independently for each species. These parameters can also be visualized directly in the **Layout view**, giving you a clearer and more practical overview of welfare conditions across your facility.

0 very low 5 low 30 standard 60 high 100 very high ∞

Sex ratio

Method: Female Percentage

critical 5 warning 50 optimal 70 warning 100 critical

Welfare parameter settings (Species detail)

- **Faster action with dashboard monitoring:** With the new **welfare dashboard pages**, you can quickly monitor containers where welfare parameters are outside the optimal range. This makes it easier to identify issues early and take prompt action when needed.

Containers outside defined welfare limits (e.g., sex ratio or animals per container).

- **More practical list exports:** The new **Custom export** option reflects your current **Column settings** and the **order of items** in the list. This means your exports now match exactly what you see on screen, making data handling and reporting more efficient.

- **Smoother workflows with background processing:** We have significantly improved the handling of **large batch operations**. These tasks now run in the background, allowing you to continue with the next steps of your workflow without interruption. The result is a faster and more seamless experience across the application.

- **QR scanning in animal pickers:** We have streamlined **animal selection for all actions** across the platform with QR code scanning. This feature can be used for individual animals as well as cages, tanks, and other entities, helping you save time and reduce manual searching during routine workflows.

- **Animal exports:** It is now possible to easily document and **manage animal exports** when animals are transferred to another facility or released into nature. This helps you keep records complete and consistent while supporting clear tracking of animals leaving your institution.

- **Training videos:** You can now access **ZETA tutorials and recorded training sessions** directly within the application. Whether you need a quick reminder or a more detailed walkthrough of a feature, training materials are now easier to find and view whenever needed.

Want to see it in action?

If you're not our customer yet, you can now book a **free demo** to explore the latest version of ZETA. After the call, you will receive access to a **free trial** of the software so you can explore it inside your facility.

Why ZETA?

ZETA is the facility management software designed to contribute to your animal welfare. Our interactive software offers customized features to fit your organization's unique needs. With advanced functions and top-tier security, ZETA is the exact solution your facility has been searching for.
